

Assignment-1,

10 types of websites (Definition, features, exclusive features, 3 example of each type of websites)

Md. Jobaer Hossain

Batch no. IB-SQA-05

Overview of Worldwide Domain Name Registrations

The total number of registered website domains worldwide continues to grow rapidly, reflecting the expansion of the internet and digital services. Recent estimates indicate that there are approximately **364.3 million registered** domain names globally, with .com domains dominating the market at around 161 million registrations, accounting for nearly 42% of all domains. When combined with .net, the total exceeds **174.2 million registrations**, highlighting the strong presence of these generic top-level domains. These domains support a wide range of web applications, including commercial businesses, eCommerce platforms, educational institutions, government services, and non-profit organizations. The global domain name system is regulated and maintained by organizations such as ICANN, which ensures proper domain allocation and overall internet stability. As more individuals and businesses establish an online presence, the number of active domains continues to increase steadily each year.

10 popular web applications along with their key features.

1. E-commerce Websites

Definition: Websites used to buy and sell products or services online.

Features:

- Product listings
- Shopping cart
- Payment gateway
- Order tracking

Exclusive Features:

- Inventory management
- Discount/coupon systems
- Secure checkout (SSL, payment security)

Examples:

- Amazon
- eBay
- Alibaba

2. Blogging Websites

Definition: Platforms where individuals or groups publish articles or posts regularly.

Features:

- Posts/articles
- Categories and tags
- Comments section
- Archives

Exclusive Features:

- Personal voice/branding
- SEO-focused content publishing
- Subscriber/newsletter integration

Examples:

- WordPress
- Medium
- Blogger

3. Portfolio Websites

Definition: Showcase personal or professional work, often used by creatives.

Features:

- Project gallery
- About section
- Contact form
- Resume/CV

Exclusive Features:

- Visual storytelling
- Interactive design elements

- Case study presentation

Examples:

- Behance
- Dribbble
- Adobe Portfolio

4. Business/Corporate Websites

Definition: Websites representing companies and their services.

Features:

- Company information
- Services/products pages
- Contact details
- Testimonials

Exclusive Features:

- Brand identity and messaging
- Lead generation forms
- Corporate reports and updates

Examples:

- Apple
- Microsoft
- Tesla

5. Social Media Websites

Definition: Platforms for social interaction and content sharing.

Features:

- User profiles
- Messaging
- Content sharing (text, images, video)
- Notifications

Exclusive Features:

- News feed algorithms
- Likes, comments, shares
- Real-time interaction

Examples:

- Facebook
- Instagram
- X

6. Educational Websites

Definition: Provide learning resources, courses, or academic content.

Features:

- Courses and lessons
- Video tutorials
- Quizzes/assignments
- Certifications

Exclusive Features:

- Learning management systems (LMS)
- Progress tracking
- Interactive learning tools

Examples:

- Coursera
- Khan Academy

- Udemy

7. News Websites

Definition: Provide current events, journalism, and news updates.

Features:

- Breaking news
- Categories (politics, sports, tech)
- Multimedia content
- Search/archive

Exclusive Features:

- Real-time updates
- Editorial content
- Subscription models

Examples:

- BBC News
- CNN
- The New York Times

8. Entertainment Websites

Definition: Offer entertainment content like videos, music, or games.

Features:

- Streaming media
- Recommendations
- User subscriptions
- Search and playlists

Exclusive Features:

- Content algorithms
- On-demand streaming
- Original content production

Examples:

- Netflix
- YouTube
- Spotify

- Search bar
- Indexed web pages
- Filters and sorting
- Instant results

Exclusive Features:

- Crawling and indexing algorithms
- AI-based ranking systems
- Personalized search results

9. Forum Websites

Definition: Online discussion platforms where users share ideas and ask questions.

Features:

- Threads and topics
- User accounts
- Replies/comments
- Moderation

Exclusive Features:

- Community-driven content
- Voting systems
- Reputation/karma points

Examples:

- Reddit
- Quora
- Stack Overflow

Examples:

- Google
- Bing
- Yahoo

1. E-commerce

Online buying & selling platforms

Examples: Amazon, Daraz

Common domains: .com, .store, .shop

2. Commercial / Business

Company websites, services, branding

Examples: company portfolios, agencies

Common domains: .com, .biz

8. Entertainment / Gaming

Games, streaming, media content

Examples: gaming sites, video platforms

Common domains: .com, .gg

9. Social / Community

Forums, social networks

Examples: discussion platforms

Common domains: .com

10. Health / Medical

Hospitals, clinics, health services

Examples: medical portals

Common domains: .com, .health

Top 10 Popular Web Platforms with Their Domains and Technologies

Google

Domain: google.com

Title: Search Engine & Web Services

Technologies: C++, Java, Python, Go

Related domains to google.com, grouped by what they're commonly used for:

- Core Google Services
 - google.com
 - google.net
 - google.org

- Regional Google Domains

- google.co.uk (UK)
- google.ca (Canada)
- google.com.bd (Bangladesh)
- google.co.in (India)
- google.com.au (Australia)
- google.co.jp (Japan)

- Communication & Productivity

- gmail.com
- mail.google.com
- docs.google.com
- drive.google.com
- sheets.google.com
- slides.google.com

- Media & Entertainment

- youtube.com
- music.youtube.com

- Cloud & Developer Services

- cloud.google.com
- firebase.google.com
- developers.google.com

- Utilities & Tools

- maps.google.com
- translate.google.com
- photos.google.com

- Ads & Business
 - ads.youtube.com
 - googleads.g.doubleclick.net
- Developer & API
 - developers.google.com/youtube
 - api.youtube.com
- Account & Support
 - accounts.google.com
 - support.google.com/youtube
 - help.youtube.com
 - Infrastructure (Google)
 - googlevideo.com
 - ytimng.com

YouTube

Domain: youtube.com

Title: Video Sharing Platform

Technologies: Python, JavaScript, Go

Related domains to youtube.com, grouped by what they're commonly used for:

- Core Domains
 - youtube.com
 - youtu.be
- Platform Access

Amazon

Domain: amazon.com

Title: E-commerce Platform

Technologies: Java, JavaScript, AWS

Related domains to amazon.com, grouped by what they're commonly used for:

- Core Amazon Domains
 - amazon.com
 - amazon.co.uk
 - amazon.in
 - amazon.ca

- amazon.de
- amazon.co.jp
- amazon.com.au
- Services & Platforms
 - aws.amazon.com
 - sellercentral.amazon.com
 - vendorcentral.amazon.com
 - affiliate-program.amazon.com
- Media & Entertainment
 - primevideo.com
 - music.amazon.com
 - audible.com
 - twitch.tv
- Devices & Ecosystem
 - alexa.amazon.com
 - kindle.amazon.com
 - Logistics & Misc
 - amzn.to
 - amazon.jobs

- meta.wikimedia.org
- data.wikimedia.org
- Development & Tools
- mediawiki.org
- phabricator.wikimedia.org

○ Language Subdomains
(Examples)

- en.wikipedia.org
- bn.wikipedia.org
- es.wikipedia.org
- fr.wikipedia.org
- de.wikipedia.org

Twitter

Domain: twitter.com/x.com

Title: Microblogging Platform

Technologies: Ruby on Rails, Scala, JavaScript

Related domains to twitter.com, grouped by what they're commonly used for:

- Core Domains
 - twitter.com
 - x.com
 - t.co
- Apps & Platform Access
 - mobile.twitter.com
 - m.twitter.com
- Developer & API Services
 - developer.twitter.com
 - api.twitter.com
 - platform.twitter.com
- Ads & Business
 - ads.twitter.com
 - business.twitter.com
- Account & Authentication
 - account.twitter.com
 - help.twitter.com
 - support.twitter.com

Wikipedia

Domain: wikipedia.org

Title: Free Online Encyclopedia

Technologies: PHP, MySQL

Related domains to wikipedia.com, grouped by what they're commonly used for:

- Core Wikimedia Projects
 - wikipedia.org
 - wikimedia.org
 - wiktioary.org
 - wikibooks.org
 - wikiquote.org
 - wikisource.org
 - wikiversity.org
 - wikivoyage.org
- Media & Data
 - commons.wikimedia.org

- Analytics & Media
 - analytics.twitter.com
 - publish.twitter.com
- Engineering & Research
 - blog.twitter.com
 - engineering.twitter.com

Instagram

Domain: instagram.com

Title: Photo & Video Sharing

Technologies: Python (Django), JavaScript, React

Related domains to instagram.com, grouped by what they're commonly used for:

- Core Domains
 - instagram.com
 - instagr.am
- Apps & Web Access
 - www.instagram.com
 - m.instagram.com
- Related Social Platforms (Meta)
 - facebook.com
 - messenger.com
